STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician. Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Manaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Chall," "Ulancia," "Wood-lance," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if, impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably sui-

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION .- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman. (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman," "Manager," "Dealer," etc. without more precise specifications, as Day laborer. Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy." "Collapse." "Coma." "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy." "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age." "Shock." "Uraemia." "Weakness." etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

**DUTY OF LOCAL REGISTRARS**—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, C mpositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman," "Manager," "Dealer." etc. without more precise specifications, as Day laborer Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"): Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," "Senile," etc.), "Dropsy," "Exhaustion," ("Congenital." "Heart Failure." "Hemorrhage." "Inanition." "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATE OF IDAHO

STATEMENT OF OCCUPATION.—Precise statement of o cupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman. (b) Grecery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc, without more precise specifications, as Day laborer Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Hous-keepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"): Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of o supation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc, without more precise specifications, as Day laborer Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who. have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculos's of lungs meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ................................ (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough: Chronic valvular heart d'sease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy." "Exhaustion." "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritenitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was dertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head—homicide: Poisoned by carbolic acid—probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION .-- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"): Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always quality as "PHERPERAL sentions" "PHERPERAL sentions" "PHERPERAL sentions" as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"): Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

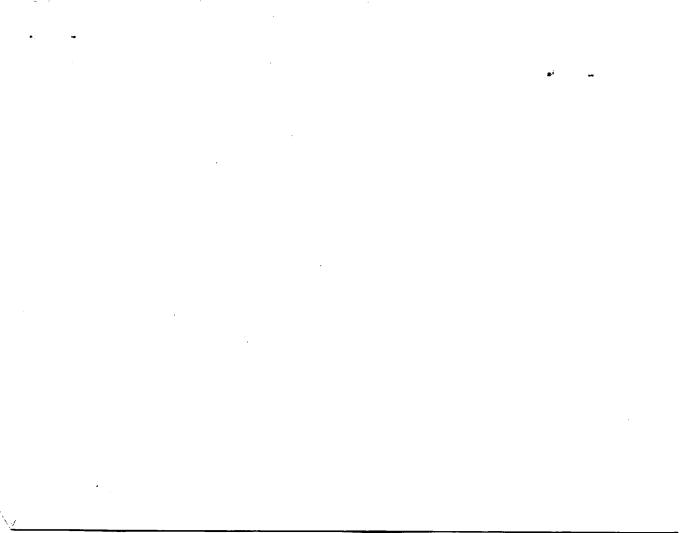

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer. Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager." "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of .....(name origin; "Cancer' is less definite; avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congental," "Senile." etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia." "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train -accident: Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

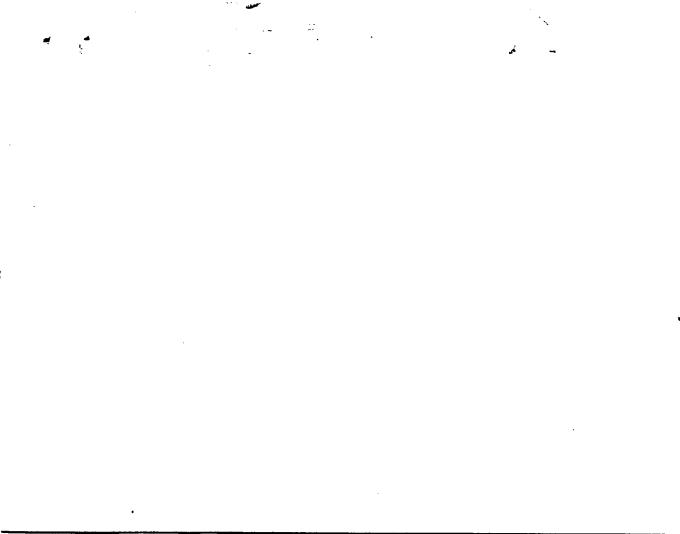

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"): Lobar pneumonia: Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager." "Dealer." etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"): Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite): Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bron-chopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"): Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia." unqualified, is indefinite): Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head—homicide: Poisoned by carbolic acid—probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION .- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mili; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer." 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

term for the same disease. Examples: Cerebro-spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhold fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of \_\_\_\_\_ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock, "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"): Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Steno-grapher, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia, ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

mudwire.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement: it should be used only when needed. As examples: (a) Spinner. (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

term for the same disease. Examples: Cerebro-spinal fexer (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma. Carcoma, etc., of ...... (name origin: "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock, "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS —Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a mid wife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

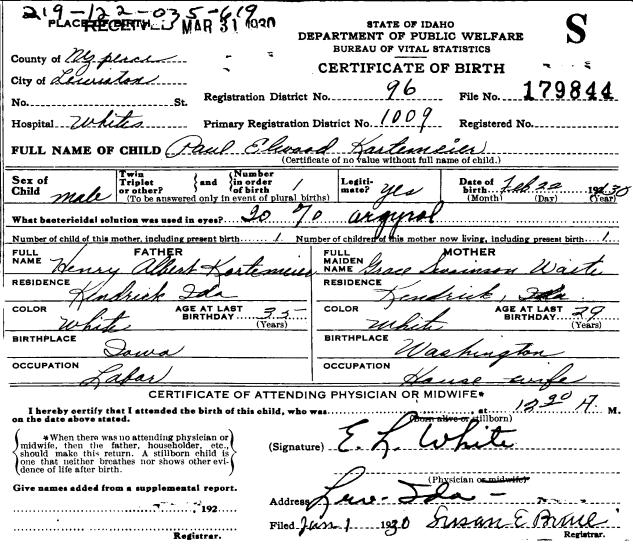

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheuntonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Mrs. R.G. Beeson Kimberly BIRTH REGISTRATION IS A PART OF EVERY CHILD'S BIRTHRIGHT.
DO YOUR DUTY BY YOUR CHILD AND COMPLETE THE CERTIFICATE.

- Doar Madam:

ILAHO is now in the United States Birth Registration Area and it is essential that birth certificates be made complete in every particular. Kindly fill in the information requested below and return at your earliest convenience. A franked envelope, which requires no postage, is enclosed for your use in returning the same. A government certificate for your baby will be forwarded you in due course.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the firstline will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemie cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "In "ition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

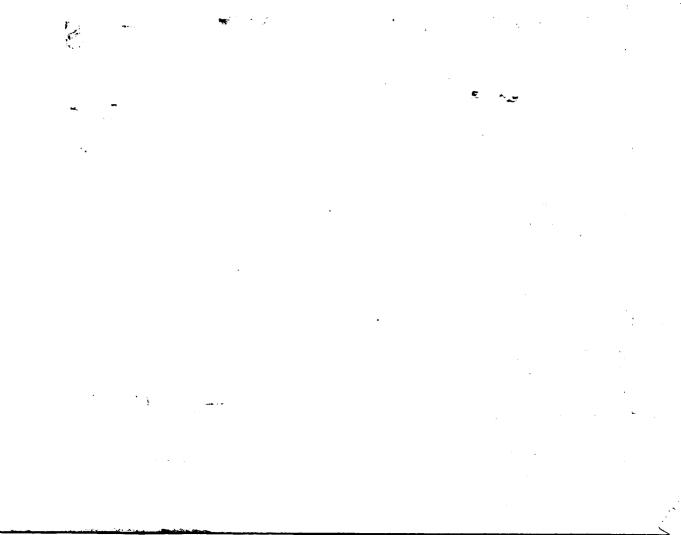

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATE OF IDAHO RECORD be made for PUBLIC WELFARE BUREAU OF VITAL STATISTICS CERTIFICATE OF BIRTH PERMANENT I RETURN must b th stated. Registration District No. State File No..... Prim. Registration District No. 194 Local Registrar's No. (If born in hospital or institution give name.) A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock" "Uraemi," "Wookness," etc., when eldefinite "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to de-

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

termine definitely. Examples: Accidental drowning:

struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

head of "Contributory."

Do not accept a certificate of death signed only by a midwife.

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months,

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile **Factory.** The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month: keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

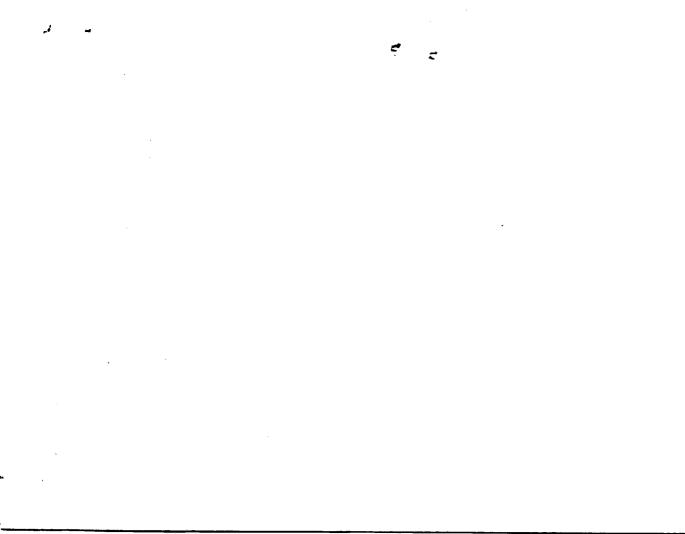

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

---

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.-Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory, The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer." etc. without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma. Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition." "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid—probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the case of the constant of the control of the disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

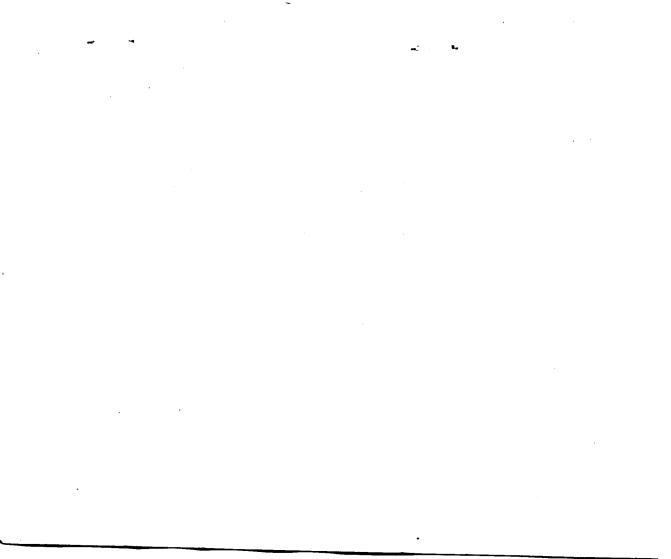

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATE OF IDAHO DEPARTMENT OF PUBLIC WELFARE BUREAU OF VITAL STATISTICS County of CERTIFICATE OF BIRTH Registration District No......State File No...... Primary Registration District No......Local Registrar's No..... (Certificate of no value without full name of child) Number Twin Date of Legiti-Sex of Triplet in order or other? matel Child (Dav) (To be answered only in event of plural births) (Month) (Year) What bactericidal solution was used in eyes? Number of child of this mother, including present birth\_ Number of child of this mother now living, including present birth. FULL NAME COLOR COLOR CERTIFICATE OF ATTENDING PHYSICIAN OR MIDWIFE\* I hereby certify that I attended the birth of this child, who was { Stillborn on the date above stated. \*When there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after birth. Give names added from a supplemental report. Registrar.

| W. 4                                                                   | Tilled Management                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF

INJURY and qualify as ACCIDENTAL, SUICIDAL, or

HOMICIDAL, or as probably such, if impossible to de-

termine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

head of "Contributory."

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

C.K. MACEY SPECIAL AGENT

Boise, Idaho

MAY 2 0 1930

Mrs. W. M. Otis Jerome BIRTH REGISTRATION IS A PART OF EVERY CHILD'S BIRTHRIGHT.
DO YOUR DUTY BY YOUR CHILD AND COMPLETE THE CERTIFICATE.

Doar Madam:

IDAHO is now in the United States Birth Registration Area and it is essential that birth certificates be made complete in every particular. Kindly fill in the information requested below and return at your earliest convenience. A franked envelope, which requires no postage, is enclosed for your use in returning the same. A government certificate for your baby will be forwarded you in due course.

THE ABOVE IS S.—Every ite should state if not at place of death 15. SYMS - YORK CO., PTRS. & BORS. 24654

A stillbirth must be registered both as a birth and death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager." "Dealer," etc., without more precise specifications, as Day laborer. Farm laborer. Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated this: Farmer (retired, 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH.—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL, septicemia," "PUERPERAL peritonitis," etc., all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train -accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g., sepsis. tetanus) may be stated under the head of "Contributory."

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death certificate should further state, if known, the cause of the stillbirth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Charles," "Will. "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

(If born in hospital or institution Prim. Registration District No. 1.1.76. Local Registrar's No... give name.) FULL NAME OF CHILD.... STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age,"
"Stack," "Usonie," "Westerness," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

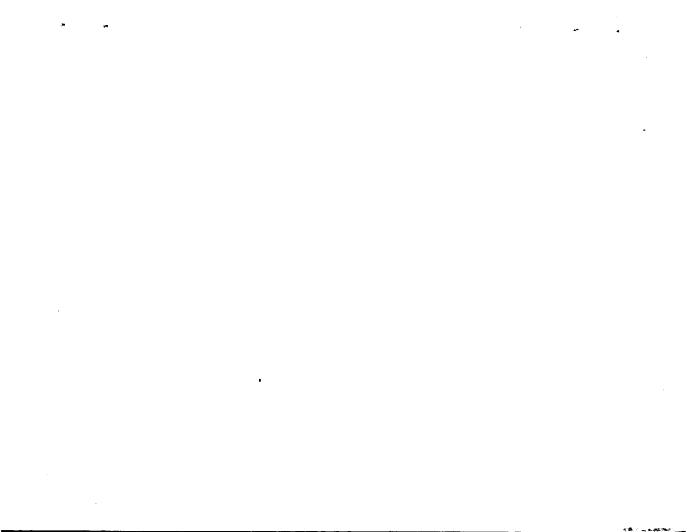

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

RECORD be made for E-OF IDAHO DEPARTMENT OF PUBLIC WELFARE County BUREAU OF VITAL STATISTICS City of ..... CERTIFICATE OF BIRTH PERMANENT | RETURN must b th stated. STATEMENT OF OCCUPATION.—Precise statement of o supation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory, The material worked on may form part of the second statement. Never return "Laborer." "Foreman," "Manager," "Dealer," etc. without more precise specifications, as Day laborer Farm laborer. Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 vrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia: Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculos's of lungs, meninges, peritoneum, etc., Careinoma, Sarcoma, etc., of ...... (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy." "Exhaustion." "Heart Failure," "Hemorrhage." "Inanition." "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor. Architect, Locomotive engineer. Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement: it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman. (b) Grocery: (a) Foreman. (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"): Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of .....(name origin; "Cancer' is less definite; avoid use of "Tumor" for malignant neoplasms: Measles: Whooping cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death). 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse." "Coma," "Convulsions," "Debility," ("Congental." "Senile." etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock." "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train -accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

BIRTH REGISTRATION IS A PART OF EVERY CHILD'S BIRTHRIGHT.
DO YOUR DUTY BY YOUR CHILD AND COMPLETE THE CERTIFICATE.

Dear Madam:

IDAHO is now in the United States Birth Registration Area and it is essential that birth certificates be made complete in every particular. Kindly fill in the information requested below and return at your earliest convenience. A franked envelope, which requires no postage, is enclosed for your use in returning the same. A government certificate for your baby will be forwarded you in due course.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning:

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

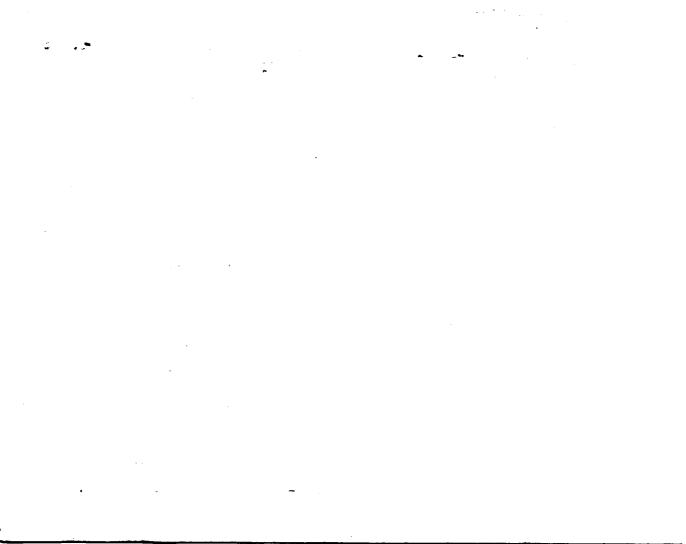

sequences (e. g. sepsis, tetanus) may be stated under the

Do not accept a certificate of death signed only by a

midwife.

head of "Contributory."

STATEMENT OF OCCUPATION .-- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

Do not accept a certificate of death signed only by a midwife.

THE WAR TO A ...

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The guestion applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

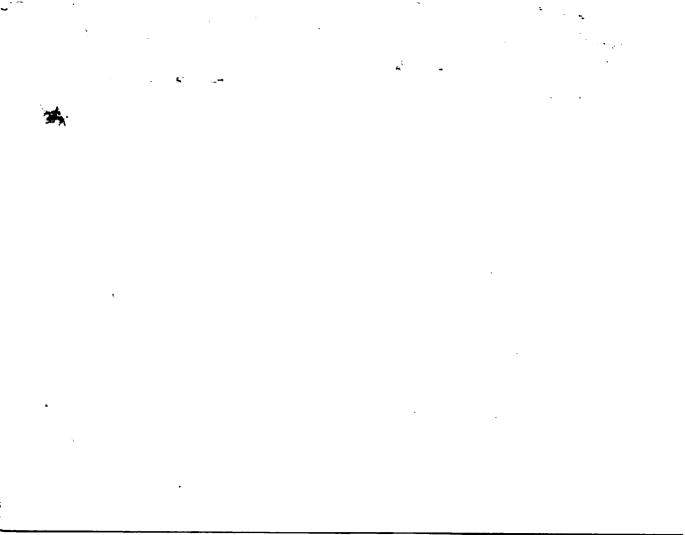

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bron-chopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shaek", "Urparie," "Woolpage," etc., be to the college." "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

mawne.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman. (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman," "Manager." "Dealer," etc, without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ...... (name origin): "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus." "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

Place of Burial, Cremation, or Removal Date of Burial Earl Brownfield Informant. 19 Hohlerlawn 1605 3st No. (Address) 20. Undertaker Address Robinson File Ju ampa Ida. Registrar m.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inantition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

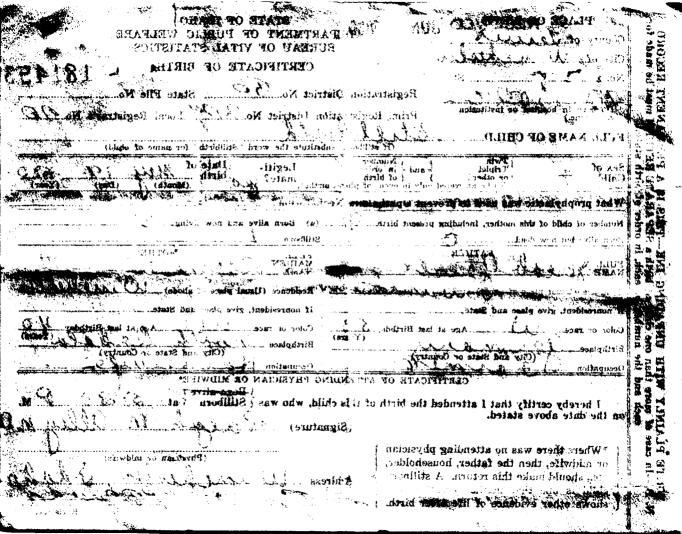

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

:

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bron-chopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marshamus," "Old age,"
"Shook" "Urnomis," "Woolkness," attaining "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

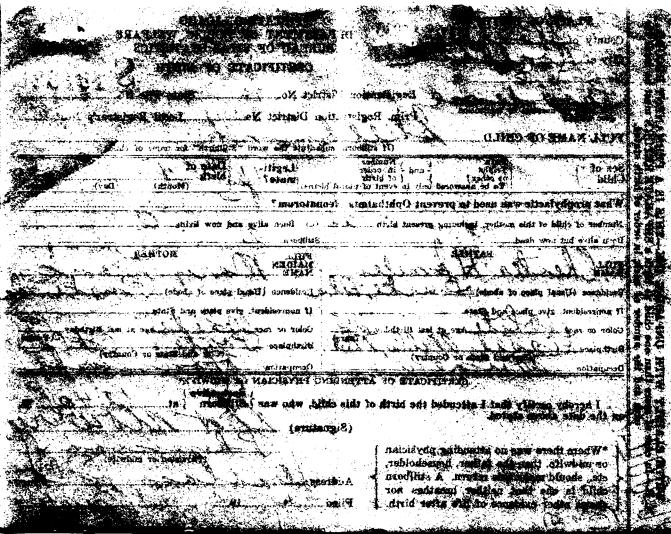

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

٠.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"): Typhoid fever (never report "Typhoid Pneumonia"): Lobar pneumonia: Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

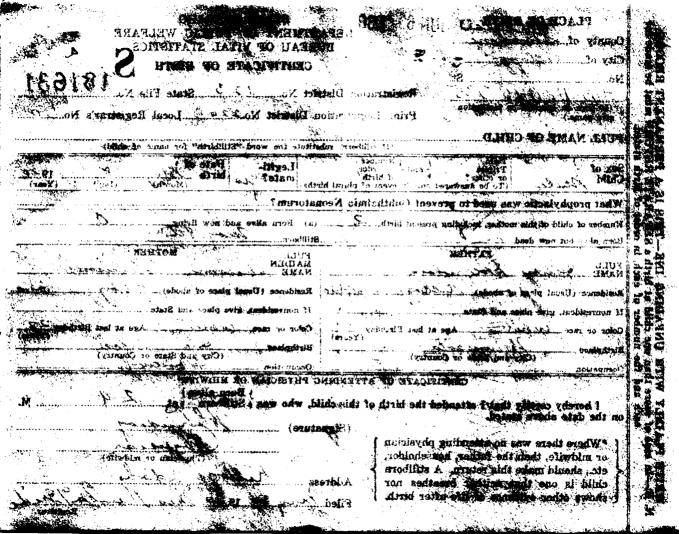

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

٠.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Steno. grapher, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS Maileall death certicates filed with your to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of ager For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of filness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the ISEASE CAUSING DEATH (the primary affection with spect to time and causation), using always the same cepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

UTY OF LOCAL REGISTRARS—Mail all death certise filed with you to the State Registrar on or before the fith of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year very number one. Carefully examine each certificate before assuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect. Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery: (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc, without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"); Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite): Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ................................ (name origin): "Cancer" is less definite: avoid use of "Tumor" for malignant neoplasms; Measles; Whooping Cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Faifure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.
